Eccovision

The Eccovision Acoustic Pharyngometer / Rhinometer System will be the centerpiece of your dental sleep medicine practice. Patient screening, nasal and oral airway evaluations as well as records for appliance bite registration and adjustment will all be taken on the Eccovision system.

"Eccovision is the only practical way for clinicians to evaluate the dynamic nasal and pharyngeal airway without radiation or sedation. It gets me to the final position more effectively & efficiently than any other method, making appliance therapy more profitable."

-Dr. Jeff Horowitz

(1) Watch-PAT 300 HST Systems

Custom online sleep management portal for patient records, sleep test diagnostic reports & physician interpretations

Physician Network

SGS will pair you up with a board certified sleep physician in your state to interpret/diagnose your sleep tests and provide "medical necessity" for oral appliance therapy

Medical Billing Solution

You will be set up with a 3rd party team of medical billing specialists who will handle all medical billing for your sleep practice. From verification of benefits, pre-authorization to claim submissions and payments it will be handled for you

Training For Your Practice

An SGS Certified Sleep Care Coordinator will come train all members of your team on their role to ensure success with dental sleep medicine. Hands on clinical training and a complete patient protocol walk through will be covered

Support

You'll have a dedicated customer relations rep to assist with all dental sleep medicine needs as well as online access to our client portal with a library of helpful videos and info

We Look forward to helping you change lives, save marriages and achieve tremendous personal and professional success with dental sleep medicine!
